Our immediate vicinity offers limitless opportunities for four-wheelers, ATV’s & OHV’s along the trails built for those who seek such thrills. All of these have one factor in common: they traverse some of the most beautiful scenery in the world, abundant with wildflowers, ghost towns, abandoned mines and minerals, all with breathtaking vistas.

4-Wheel Drive Trails

Yankee Boy Basis (Class 2, Moderate) Follow the Camp Bird Road 10 miles taking the right fork to Yankee Boy Basis. After stopping to enjoy Twin Falls, follow the trail into the basin just below the 14,000 foot peak of Mt. Sneffels. The last two miles are very steep and rough; you may want to park and hike the remaining distance. Yankee Boy Basis is an ideal area for viewing vast meadows of wildflowers in mid-summer. **This is a one lane road with a lot of traffic including heavy equipment and large trucks. Please pay attention and share the road. Do not attempt unless you are prepared to back up if necessary to allow traffic to pass. Traffic traveling in the uphill direction generally has the right of way, but State Law requires that if vehicles cannot pass on a narrow road, whichever vehicle can more readily back up must do so, and that may be a smaller vehicle traveling uphill.**

Imogene Basis (Class 4/5, Very Difficult) Imogene Basis is one of the more difficult drives between Ouray and Telluride. Follow the Yankee Boy Basis description up Camp Bird Road 5 miles. The road turns left over the river onto a new road, which vehicle can more readily back up must do so, and that may be a smaller vehicle traveling uphill.

Engineer Pass (Class 3, Difficult) Although this is not as technically difficult as Black Bear and Imogene, it does demand more skill than other trails. Choose from two different trail heads to get to Engineer Pass from Ouray. The first choice is about 4 miles south of Ouray on Hwy 550. Look for the trail entrance on your left, marked by a cascading waterfall and a staging area. This road involves 2 miles of extremely rocky areas that are very steep and rough; you may want to park and hike the remaining distance. Many vehicles should view the Engineer Pass trail with caution. The second, smoother, option follows the trails to CorkscREW and California Gulches. In Animas Forks, pick up the Engineer Pass trailhead to the left. Engineer Pass continues on for all miles south of Ouray. The trail is suitable for 4WD vehicles off road, but watch for rockslides and other hazards along the way. It is recommended that you go with one of the local outfitters. Leave Ouray south on Hwy 550 and drive 13 miles past the summit of Red Mountain. Turn right onto the road to Engineer Pass. Black Bear is a steep, narrow, dangerous trail from 550 to the summit but becomes ONE-WAY ONLY from the summit to Telluride. The ascent is easy, with spectacular views. At the top you may turn around and return the way you came. If you’re still feeling bold, continue on to the infamous “steps” and sharp switchbacks. The road is extremely narrow. Short wheel base vehicles are preferred. On the way down, make sure to stop at Bridal Veil Falls.

Ophir Pass (Class 2, Moderate) This is an easier pass in the area and will take you to Telluride. It was originally a wagon road between the mines in Ophir, Telluride and Silverton. Drive south of Ouray on Hwy 550 for 18.1 miles to the “National Forest Access, Ophir Pass” turnout on your right. The descent is gradual, with many wildflowers and beautiful views, to an elevation of 11,789. The descending trail is narrow & shelf-like, with one sharp switchback just over the pass, followed by an easy road to the bottom. The intersection of Hwy 145 is just beyond Ophir. Turn right onto 145 and follow it to a point where it turns right to Telluride or left to Ridgway.

Cinnamon Pass (Class 2, Moderate) The Cinnamon Pass trailhead is in Silverton, 23 miles south of Ouray on Hwy 550. Drive through Silverton on Greene St., veering right on CR 2. Drive 12 miles on this dirt road to Animas Forks. Allow extra time to explore this great ghost town. Here, pick up Cinnamon Pass east to Lake City. After you’ve reached the top of the pass at 12,620 ft., the road becomes smoother. Descend to the Lake Fork of the Gunnison River past Lake San Cristobal and on into Lake City. This path is part of the long and classic Alpine Loop.

Clear Lake (Class 2, Moderate) North of Silverton, the route to Clear Lake is short trail perfect for a limited schedule. You will encounter beautiful wildflowers during the summer season, pass historic mine sites andDeath at a spectacular mountain lake. Return the way you came. To get to Clear Lake, drive south on Hwy 550 for 22 miles to the Mineral Creek Campground turnoff to the west. Follow the road past the camping areas to the trailhead leading steeply off to the right.

Last Dollar Road (Class 1, Easy) One of the easier trails in the San Juans and one of several that link Ouray and Telluride. Some of this trail is passable in a passenger vehicle but becomes difficult in the steep sections. After turning onto Hwy 62 at Ridgway, drive 10 miles to the sign for Last Dollar Road on your left and continue 6 miles to the trail fork. Take the right fork to the town of Sawpit on Hwy 145 or the left fork, along Hastings Mesa (with great views of Sneffels Range), to join Hwy 145 just past the Telluride Airport.

Owl Creek Pass (Class 2, Moderate) Only 15 miles north of Ouray, turn east onto County Road 10. This adventurous day trip will take you into the heart of the magnificent Cimarron Mountains. Be sure to follow signs directing you through ranchlands alongside creeks and over high country meadows to the pass at 10,114 ft. The peaks of Chimney Rock and Courthouse Mountain will watch over you as you drive along this route which once was a cattle drive trail.

Stony Pass (Class 2, Moderate) From Silverton take Hwy 550 east and bear right on the only diagonal, paved road. Turn right after 5 miles on County Road 4 marked with a sign to Stony Pass. Follow this road 1.75 miles to the trailhead, the left fork of the “Y” in the road at that point.

**2-4 Hours**

- $100.00 (up to 4 people)
Although we refer to four-wheeling throughout this brochure, this information can also be used by anyone wanting to explore this magnificent area on ATVs or off-highway motorcycles, or with a locally guided tour.

If you’re not used to mountain driving, take the less challenging trips first. When preparing to take a four-wheel drive trip, remember the following safety and courtesy tips:

- Know your vehicle and its limits.
- Always check locally for road conditions.
- If you are feeling unsure, scout ahead on foot, rather than driving into an unknown situation.
- Stay on established roads and NEVER go off cross-country. The tundra is extremely fragile.
- On steep grades, gear down and proceed slowly.
- Use your gears, not your brakes.
- Always stop to lend aid or assistance if required.
- As a reminder, the vehicle traveling UPHILL has the right-of-way but taking turns based on where turnouts are located is a common courtesy. Pull over only where there is room to pull off and yield to on-coming traffic if you are going downhill!
- The trails and roads in this guide are rated according to class (relative difficulty):

Many of our off-highway vehicle (OHV) trails cross privately owned mining claims. Most owners have allowed people to pass through their property. It is the responsibility of all back-country enthusiasts to respect that privilege and treat Ouray’s “backyard” respectfully. Please pick up a free OHV packet at the Visitor’s Center.

There are more four-wheel drive trails in this region than those listed here. Topographical maps and more detailed books are available in many Ouray shops.
